

Philosophy

KICK-ASS CREATIVE

At Design Junkies we are passionate about the power of design. Design provides a competitive edge; attracts your target market and makes your business memorable. Whether it's a smart new promotion or an upgrade to your brand or website, we will find the best solution to suit your needs.

We pride ourselves on high quality work created with integrity and charm. We love typography, beautiful imagery and making our clients happy! We also believe designers should have a broad education in approaching design. Its not just about a great university qualification, but also 'street smarts' to help with the practical application of problem solving. We are forced to make mental acrobatics everyday, multiple times a day, going from a glittering high end event invitation to a beauty salon to shopping centre. We put ourselves in your shoes, then in your customers shoes then back to ours, so we gotta be flexible! We are excited to be in this industry at this exact point in time.

We have one foot planted firmly on the ground embracing the traditional processes and one looking to the future keeping up with new technology and software that enters the marketplace. We look forward to working with you soon!

*Design with charm,
integrity & most
importantly... results!*

MISSION STATEMENT
